

WORLD-FAMED "BOA" HORNS.

THE HORN WITH AN UNQUALIFIED GUARANTEE OF SATISFACTION TO THE USER.

The road in these Horns is lead to the Pulch. By this method the sound is projected through the world largest of tapered tubing thereby increasing the volume and length of note. No distance more with parallel tubing can equal the clarity for time or depth of sound. Best design in the world with a strong brass horn.

Remember: A good horn is an Accident-avoider.
