India made great strides on her own in industry and technical know-how. Textile mills flourished. Men were not left behind as fashions catered to both sexes.

Ads also acted as a medium of educating the people and keeping them in touch with the economic and social changes in the country. Progress was portrayed through ads. Certain products which had been entirely European, were now solely manufactured by Indian industries.

Ads also became a medium through which the politics could help shape the nation. Naturally political parties kept a grip on this medium, as
