CANDLE POWER.

ESTIMATES  
& SKETCHES  
FREE.

## NOTICE.

### THE RICHARDSON & CRUDDAS CONCERN.

Information has come to me recently that certain firms are endeavouring to pur-  
sue Kitson Lamps and parts pertaining to the system throughout India and agents  
in London, Glasgow and elsewhere. I wish to inform the public generally that  
Messrs. Richardson and Cruddas of Bombay are the SOLE AND EXCLUSIVE  
AGENT for the whole of India, Burmah and Ceylon for the sale of all lighting  
and are even attempting to introduce other persons to supply lamps for  
use in India, Burmah or Ceylon except through Messrs. Richardson and Cruddas  
or one of their authorized sub-agents under themselves, that they do so at their  
own risk and constitute themselves by so doing infringers of our patents.

These lamps and parts are protected by numerous patents granted to us and I  
hereby inform the public generally that the uses of such lamps are controlled  
manufacture by my Company and obtained through my Agents, Messrs. Richardson  
and Cruddas, under themselves together with the dealers below.

I am about to institute suits against several firms for illegally manufacturing  
and importing these lamps and parts thereof.

Messrs. Richardson and Cruddas have instructions to take vigorous action in all  
such cases.

ARTHUR KITSON.

The inventor and proprietor of the Kitson Lamp. Patent No.  
December 10th, 1909.
